

# e-Learning Program

We are glad to introduce our e-Learning solutions to meet the new requirements of PCI DSS or PA DSS 3.2 for developers as well as for the security awareness requirements.

## PCI DSS and PA DSS annual training program For Developers

Are you looking for a solution towards the new annual requirement 6.5 for PCI DSS 3.2 or PA DSS 5.1.7 to train your developers towards Application Security?

### We have the solution:

**Ubitrak provides a new up-to-date e-Learning class on how to design secure applications while meeting the PCI standards.**

Our e-Learning course contains 4 modules designed to provide 8 CPE\*, has been developed by security experts including PA-QSAs and University Teachers. It covers the newest techniques in application security for different types of O/S and needs. This course is designed for developers at all levels of experience and it is programming language agnostic

### Module 1

UBI-110 Introduction to the risks for application design including cybercrime monetization and what is required for the design methodology by the council.

### Module 2

UBI-120 Description of modern attacks like memory scrapping and JavaScript injection.

### Module 3

UBI-130 Defensive software design, a must today and available tools to prevent attacks.

### Module 4

UBI-140 Comprehensive overview of the SDLC vs PCI DSS requirements, Testing tools, modern prevention system and WAF.

\* Continuing Professional Education. The course is composed of 4 modules of typically 2 hours including Quiz. Some experienced developers may do it faster.

## PCI DSS and PA DSS annual training program Security Awareness

As well, our course on security awareness and PCI DSS standard is designed to respond quickly and efficiently to PCI DSS requirements 12.6. We not only cover the subjects required by the PCI DSS standard but also address new modern attacks such as phishing that can affect the daily PCI staff. The training is available in various categories of PCI DSS functions and in a few different languages.

This developer training is also available for PA DSS (in English only).
